

Client Care Desktop

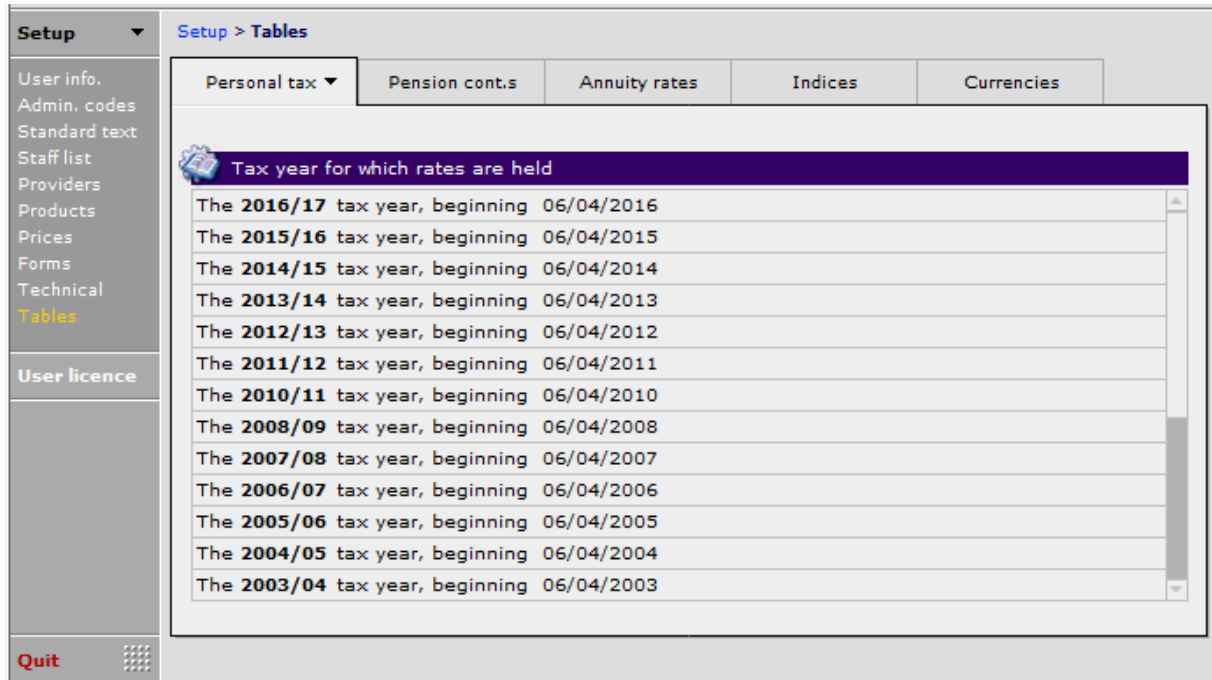

**Importing the 2017/18 Tax Table
(CCD Version 4.x)**

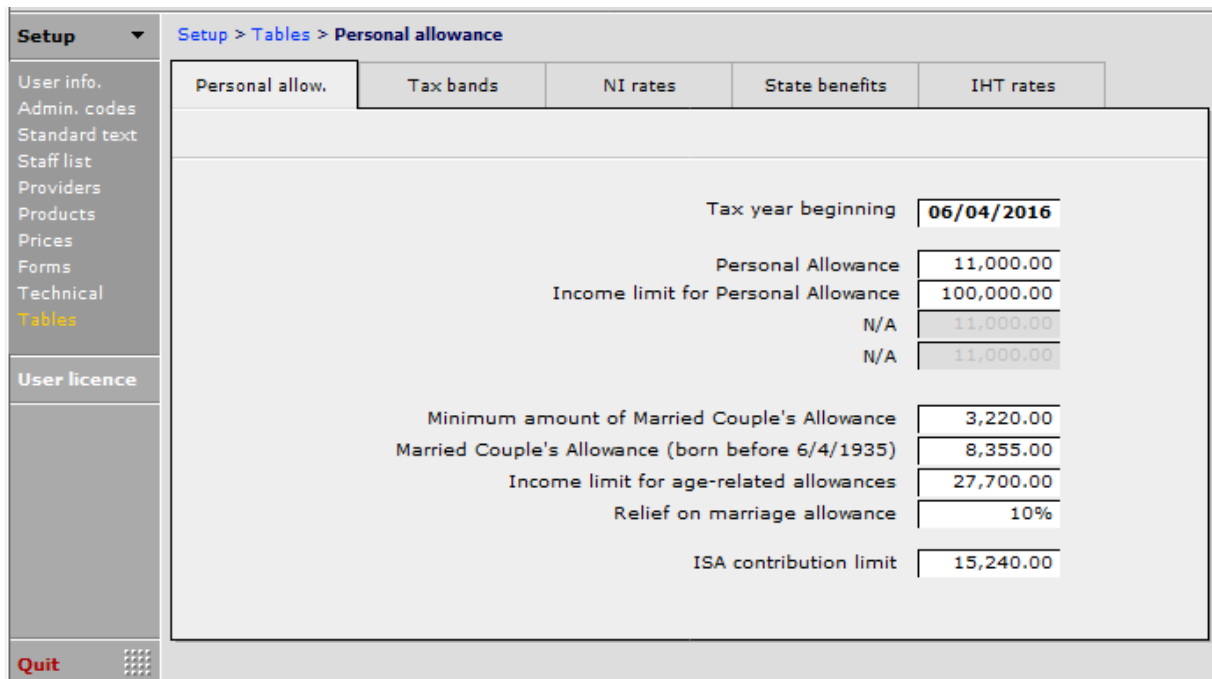

**SYNAPTIC
CLIENT CARE**

The first step in adding the 2017 tax record to Client Care Desktop (CCD) is to save the excel spreadsheet 'Tax Tables_2017_2018' to your desktop as you will need to import this file into your system.

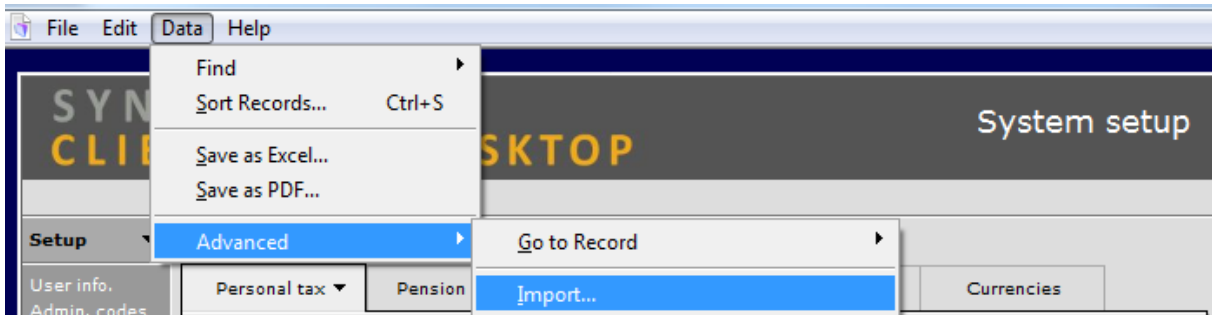

To import the 2017/18 tax record into CCD, navigate to *Setup > Tables*:

Click on any tax table in the list, you will see the following screen:

From the top menu click on **Data > Advanced > Import**, and navigate to the excel spreadsheet you previously saved on the desktop, select and click **Open**.

The Target should show **Current Table ('Tables')**.

Select **Add new records** then tick **Don't import first record** and **Arrange by: matching names**, which should display the same fields listed in both the Source fields and the Target Fields in the same order.

Once everything is set as highlighted below, click **Import**:

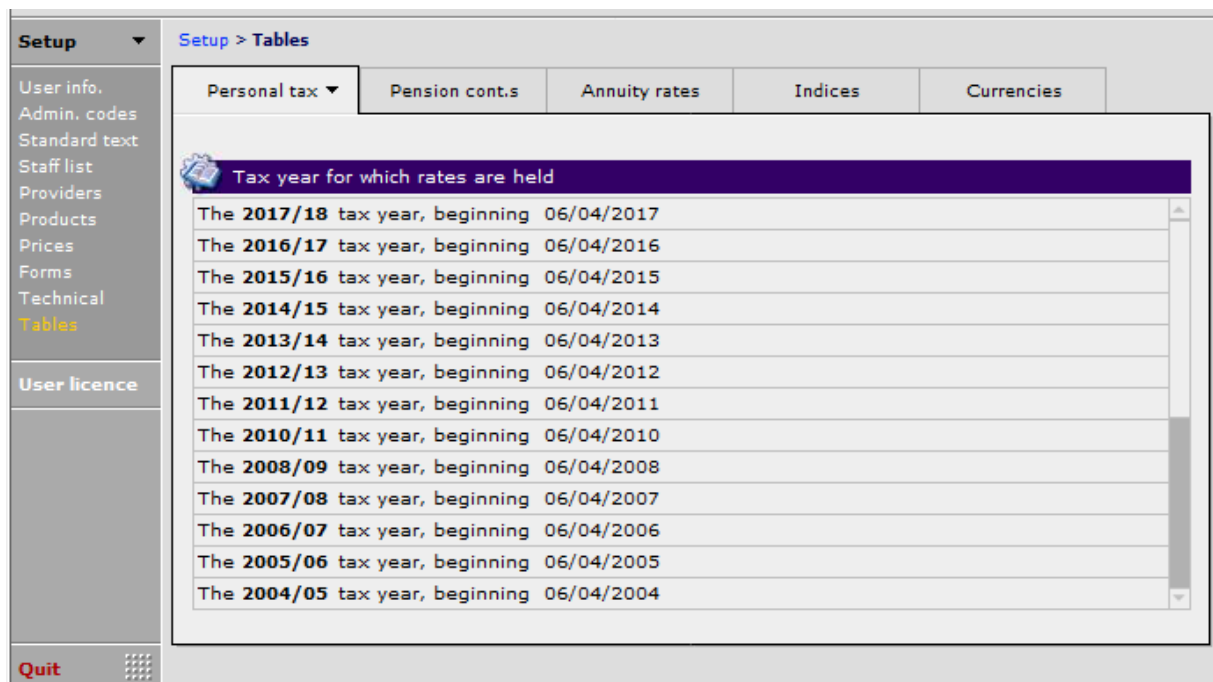

Leave **Perform auto-enter options** unticked and click **Import**.

Your new 2017 tax record will now be imported into the CCD system and you will see an Import Summary screen confirming this. Click **OK**:

The tax tables will now be available for 2017/18:
